

# C

Monitoring  
Achievement

An important aspect of ensuring that this Plan delivers in accordance with the Ipswich community values is monitoring the achievements that result from its implementation.

It is intended that this Plan will require review on a regular basis. Regular monitoring will ensure that the implementation of the Plan is effective and that the development of the Ipswich community is in accordance with the desired Vision.

Further work is to be conducted to determine the most effective method for monitoring and reviewing this Plan in the future.

A monitoring framework for the Ipswich 2020 and Beyond Plan will be focused on measuring the progressive achievement of the desired outcomes expressed in the Vision Statement and Goals of the Plan. The framework will be based on the following objectives.

- Designed to measure both the implementation of the individual actions and the achievement of the overall outcomes sought by the community.
- Directly reflects the Vision, Goals, Strategies and Actions of the Ipswich 2020 and Beyond Plan.
- The outputs of the monitoring process can be effectively communicated to the community and other stakeholders in a manner that is easily understood.
- Ensure the targets/indicators identified can be measured easily, cost effectively, and on a regular basis.
- The monitoring process is relatively transparent and can be easily understood by the stakeholders and the wider Ipswich community.
- The results can be used to revise the Plan and determine the Strategies and/or Actions that require amendment.
- Process can be undertaken on a regular basis and is generally consistent over time.
- The targets/indicators are transferable to other related activities such as Council Corporate Planning and other Council activities, regional planning initiatives, community group activities, and other stakeholder planning activities and initiatives.
