

KEEP YOUR POOL GATE CLOSED AT ALL TIMES

DID YOU KNOW?

Drowning is one of the leading causes of death for children under the age of five in Queensland.

NEVER LEAVE THE GATE OPEN WHILE YOU'RE:

- doing the gardening
- having a coffee
- playing in the yard
- answering the phone
- washing the car
- inside the house

REMEMBER

Regularly check your pool fence is safe and the gate is self-closing and self-latching, and always supervise young children around swimming and spa pools.

It only takes *seconds*
for a child to drown.
