

Ipswich City Council is currently developing a new Corporate Plan which will include a community vision. Council is seeking input from community representatives to inform the draft community vision and identify key priorities for the next 20 years. Once developed this will then be considered by the broader community through further engagement. To improve this process we ask that each representative seeks input from ten people you know on the questions below. Try to identify a diverse group of people to answer the questions (think about things such as gender, cultural background and age). Ask them to write their answers in this form. We will make sure that their responses are de-denitified when we share with the group.
